Climate Metrics Disclosure for Funds Managed and Operated by Manulife Investment Management (Hong Kong) Limited

Introduction

At Manulife Investment Management Hong Kong Limited ("Manulife IM (HK)"), we believe that climate change is a systemic risk that may have an imminent and potentially irreversible impact on the global economy, capital markets, and society at large. These impacts will manifest as both risks and opportunities for almost all companies in all industries and therefore must be properly assessed by investors in order to safeguard clients' assets.

As part of the framework to govern its management of climate-related risks, Manulife IM (HK) monitors sustainability risks and factors relevant and material to an investment including <u>climate-related risks</u>. Portfolio Carbon Footprint is considered to be a meaningful metric in assessing climate-related risks of the funds managed and operated by Manulife IM (HK).

Portfolio Carbon Footprint

Portfolio carbon footprint is a representation of carbon emissions normalised by the portfolio's market value and expressed in tons of carbon dioxide equivalent emissions (CO2e) per million dollars invested. Below is the formula for the calculation of portfolio carbon footprint¹:

The portfolio carbon footprint of the funds managed and operated by Manulife IM (HK) calculated using the formula above are shown in the tables below.

Further information on Manulife IM (HK)'s approach to sustainability including climate-related risks is accessible at <u>Sustainability</u> (manulifefunds.com.hk).

¹ <u>Circular to licensed corporations</u> <u>Management and disclosure of climate-related risks by fund managers</u>

Portfolio Carbon Footprint of Funds Managed and Operated by Manulife IM (HK)

[#]Climate-related risks are considered irrelevant for certain types of investments. For further details, please refer to <u>Disclosures on Climate-related Risk Management</u> (manulifefunds.com.hk).

'In respect of Manulife MPF Hang Seng Index Tracking Fund (the "Fund") - Effective 3 October 2023, the underlying index-tracking collective investment scheme ("ITCIS") of the Fund has been changed to ChinaAMC HSI ESG ETF ("New ITCIS"). Correspondingly, (i) the name of the Fund has changed to Manulife MPF Hang Seng Index ESG Fund, and (ii) the investment objective and balance of investments of the Fund, and the relevance of climate-related risks, have been changed in reflection of the investment policy of the New ITCIS. Please refer to the <u>relevant notice</u> (manulife.com.hk) for details.

Funds marked with (*) are not available to Hong Kong retail investors. Funds marked with (^) are not authorized in Hong Kong.

Manulife Investment Management places reliance on third-party data providers and Third-Party Managers where appropriate, who in turn place reliance on both company disclosed figures, estimates and other

sources to produce the data. Manulife Investment Management does not provide assurance as to the accuracy or completeness of such third-party data.

Carbon emissions as reported by companies may be subject to estimation error. Corporate reporting of climate-related data is typically either not audited or audited to a lower standard than a financial audit.

Data Coverage is calculated by dividing the value of investments in a fund's portfolio that have data reasonably available to Manulife Investment Management for the calculation of Carbon Footprint by the total value of the fund's portfolio.

Even after taking reasonable steps to identify the portfolio carbon footprint of the Scope 1 and 2 emissions associated with the funds' underlying investments, the Data Coverage may not be sufficiently high to produce a reported portfolio carbon footprint which is meaningful or representative of the fund's actual portfolio. Accordingly, funds with Data Coverage below 50% have been tagged as having "Not Available" Carbon Footprint in the above table. For illustration purposes, Data Coverage may be impacted by cash, cash equivalents and derivatives, sovereigns and quasi-sovereigns, securitized assets, municipal bonds and related securities, and any securities where data is not reasonably available to Manulife Investment Management for the calculation of the Carbon Footprint.

For the avoidance of doubt, where a fund is in a master-feeder fund structure, the feeder fund is subject to the risks attendant in the master fund including climate-related risks, which are managed by the investment manager of that master fund. For funds that are part of a master-feeder structure the data of the feeder fund may not be available until the master fund has provided data as part of the master fund's first reporting period. There may be limitations on data availability where the investment manager of the master fund may not be subject to similar disclosure requirements.

Data disclosures, data sources and methodologies are subject to changes as industry standards evolve, data availability improves and Manulife Investment Management enhances its climate reporting capabilities. The disclosure maybe updated from time to time without any prior notice.
