Important Notes 重要提示

- 1 Manulife Hong Kong Series - Manulife Global Dynamic Asset Allocation Fund (the "Fund") invests in a diversified portfolio of equities, debt securities, exchange-traded funds and/or collective investment schemes, which may involve market, liquidity, credit, credit ratings, below investment grade and unrated securities, credit rating downgrading, interest rates, valuation, unlisted debt securities, currency, foreign exchange, hedging, and distribution risks. Certain investors may also be subject to the risk relating to RMB hedged share class.
 - 2 The Fund does not guarantee distribution of dividends, the frequency of distribution, and the amount/rate of dividends. Dividends may be paid out of capital and/or out of gross income of the Fund in respect of Inc classes, while charging/paying all or part of the Fund's fees and expenses to/out of capital of the Fund. This represents a return or a withdrawal of part of an investor's original investment amount or capital gain attributable to that amount. Distributions will result in an immediate decrease in the net asset value of the relevant units. Class AA (RMB) Inc Hedged Unit is subject to higher distribution risks than other non-hedged unit classes.
 - 3 The Fund is subject to the risks of investing in other funds and the risks relating to asset allocation strategy and downside risk management process.
 - 4 Investment involves risk. The Fund may expose its investors to capital loss. Investors should not make investment decisions based on this material alone but should read the offering document for details, including the risk factors, charges and features of the Fund and its unit classes.
