 - 2 The relevant distributing class of the Fund does not guarantee distribution of dividends, the frequency of distribution, and the amount/rate of dividends. Dividends paid or effectively paid out of capital amount to a return or withdrawal of part of the amount of an investor’s original investment or from any capital gains attributable to that original investment, and may result in an immediate decrease in the Net Asset Value per Share in respect of the relevant class(es).
 - 3 The Fund intends to use financial derivative instruments (“FDIs”) for investment, efficient portfolio management and/or hedging purposes. The use of FDIs exposes the Fund to additional risks, including leverage risk, management risk, market risk, credit risk and liquidity risk.
 - 4 Investment involves risk. The Fund may expose its investors to capital loss. Investors should not base on this material alone to make investment decisions and should read the offering document for details, including the risk factors, charges and features of the Fund and its share classes.
